Contents

1. Guidelines for Supervisors of Fellowship Dispensing Diploma students
2. Core competencies
3. Core Competency Tracking Chart
4. Late assignments
5. ABDO contact list

Guidelines for Supervisors of Dispensing Diploma Students

Core Competencies

The course is built around a syllabus based on nine “core competencies”. Details of these competencies and a tracking chart are included for your information. The student also has a copy of these so they may keep a note of completed competencies for their own records. The official Core Competency Tracking Chart is kept in the student’s file at the College. It is completed by the College and ABDO as appropriate and submitted to Examinations and Registration in time for qualification.

College Work

Your trainee is required to submit 32 weekly assignments this year. These must be submitted to their Personal Tutor by the date on the timetable and late assignments will be penalised according to a set procedure.

Students are required to submit all coursework assignments, in line with GOC requirements, and must achieve an average mark of 40% in each subject. All units shown on the timetable with a “cc” must achieve a minimum mark of 40%; if students fail to achieve this mark they will be asked to re-submit the assignment. The deadline for re-submission will be determined by the tutor. Any late work will be treated in accordance with the Late Assignments procedure.

Second and third year students must include a “cover sheet” with each assignment. You must scrutinise their work before it is submitted to the tutor; please check that they have attempted all of the questions to the best of their ability.

Students who are unable to keep up with the schedule will be removed from the course. They are required to submit all coursework assignments, in line with GOC requirements, and must achieve an average mark of at least 40% in each subject. All units shown on the timetable with a ‘CC’ must achieve a minimum mark of 40%; if they fail to achieve this mark the tutor will ask them to re-submit the assignment. The deadline for re-submission will be determined by the tutor. Any late work will be treated in accordance with the Late Assignments procedure outlined in this booklet.

Block Release

Dispensing Diploma students are required to attend a period of intensive study, that we call block release, at the ABDO College in Kent for four weeks per year. This block release attendance is split into two fortnights and is a compulsory requirement imposed by the General Optical Council (GOC).

Block release dates are sent directly to the student as soon as they are available and every attempt is made not to alter these once issued. Please make the necessary arrangements to allow your trainee to attend.

Start and finish times of study weeks are designed to allow for the student to travel to and from the college, with sessions starting at 11.00am on Monday and finishing at 1.00pm on Friday (this may alter for weeks incorporating a bank holiday). Students are expected to attend **ALL** lessons and must present written permission from their employer or a doctor’s certificate for any sessions missed. Failure to attend at least 80% of the block release will result in the student being withdrawn from the course. Furthermore, as attendance at some lessons on block is essential (in accordance with GOC guidelines) students may be required to attend further ‘catch up’ workshops, possibly at an additional cost, if they fail to attend any of these lessons.

Regulations

Your trainee must be working in practice for a minimum of 30 hours per week as a trainee Dispensing Optician under the supervision of a suitably qualified professional. In order to supervise you must be a registered Dispensing Optician, Contact Lens Optician, Optometrist or Ophthalmic Medical Practitioner. You must have been registered for a minimum of two years without interruption. You may have only two trainee Dispensing Opticians at any one time and must be in practice with them at all times. Further requirements are specified in Part A of the Pre-Qualification Portfolio.

The Association of British Dispensing Opticians requires the Supervisor to undertake to give continuous personal supervision to the trainee and accept full responsibility for his/her actions - i.e. be on the premises whilst the trainee is attending any patient.

Further details are included in the member's Advice and Guidelines, section 1.7, which are available on the ABDO website: www.abdo.org.uk. You should ensure that you read this section in full, that you are fully conversant and agree to abide with the requirements.

IF YOU ARE CONCERNED ABOUT THESE REGULATIONS, OR DO NOT MEET THEM, PLEASE CONTACT ABDO COLLEGE IMMEDIATELY.

It is a compulsory requirement that all students are registered with the General Optical Council. The Opticians Act 1989 (amended June 2005) requires that "all Students are registered as such BEFORE they begin any formal course in training in Ophthalmic Dispensing or Optometry". It is therefore imperative that you ensure that your trainee is registered with the GOC for inclusion on the student register. Failure to do this will result in their removal from the course. Newly qualified Dispensing Opticians must be able to show that they have been registered throughout their course of study or they will not be permitted to apply for full registration.

At the same time as completing their course with ABDO College your trainee will be completing their "Pre-Qualification Period" with the Association of British Dispensing Opticians. Pre-Qualification Period information, from ABDO Examinations and Registration Department, will be issued to them on their block release.

It is your trainee's responsibility to ensure that they and their Supervisor are correctly registered with ABDO. Supervisor/Practice registration forms and guidance notes are available from ABDO Examination and Registration Department.

Please note, **both** ABDO College **and** the Exams & Registration Department must be notified if there are any changes to Supervision during the training period. The General Optical Council must also be notified.

Practice Based Learning

As part of their Pre-Qualification Period trainees are issued with a Pre-Qualification Portfolio (PQP) during their first block release session in year one. You must ensure that they are involved in a variety of tasks in the practice and meet the requirements of the PQP. They have also been given a Practical Training Timetable to help schedule practical sessions through the year. It is necessary for you to work through both of these logbooks together and for you to sign the relevant sections when you are satisfied that they are competent.

The PQP is assessed during the Final Qualifying Examination in the third year and contributes towards the final examination marks.

ABDO arrange practice visits to monitor the standard of supervision and will expect to see you, your trainee and a minimum level of practice equipment. A practice visitor could contact your trainee to arrange an appointment at any time during their three years of study.

Books

In order to satisfactorily complete their studies your trainee will need a number of textbooks. All set books are available from the ABDO College Bookshop by contacting 01227 733904 or bookshop@abdocollege.org.uk. They are also available to purchase online from the ABDO College website: www.abdocollege.org.uk.

Reports

Interim reports completed by your trainee's Tutor will be sent to you and your trainee twice a year around Christmas and Easter. A copy of these are also kept on file. The College also issues a report after each block attendance. These reports are to help you monitor your trainee's attendance, progress and ability to keep up with the schedule. There should be no surprises for either of you if you are communicating effectively with your student.

Fees

The course fee is due before the commencement of the course and despatch of coursework will be delayed until fees are paid in full. If your trainee is company sponsored please help to ensure prompt payment of fees. The student must retain ABDO membership, professional indemnity insurance and GOC registration for the duration of their studies.

Examinations

The three year Fellowship Dispensing Diploma course offered by ABDO College aims to prepare students for the Fellowship Diploma awarded by the Association of British Dispensing Opticians. This is the same academic standard as a bachelor degree with honours (NQF Level 6) and will entitle them to the suffix FBDO. There are theory exams at the end of each year and practical exams at the end of the first and third.

In order for students to be eligible to sit ABDO theory and practical examinations, all assignments must be completed with an average mark of 40% or more in each subject.

Students are permitted a maximum of four attempts at any examination, either theory or practical. A revision course must be undertaken before a fourth and final attempt at any exam.

It is the student's responsibility to ensure that they have applied and paid for their exams in good time. Please encourage them to contact the Exams Department to find out the current deadlines. Late entries will not be accepted for any reason.

Raising concerns and making complaints

If you or your trainee are unhappy about your experience or are dissatisfied about any aspect of the programme, then it is important that we know about it. If you have a complaint relating to any aspect of your trainee's studies with ABDO College please contact the Courses Team in the first instance. We may ask you to submit your complaint in writing.

Where possible, the Courses Team will attend directly to, and address the details of, your complaint.

If it is not possible to resolve your concerns in this way your complaint will be escalated to the Head of Operational Services and the College Principal as appropriate.

Contact Information

We hope that you will find these guidelines helpful whilst providing supervision for your trainee Dispensing Optician. If we can be of any further assistance please do not hesitate to contact us.

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
<p>1.Communication</p> <p>The ability to communicate effectively with the patient and any other appropriate person involved in the care of the patient, with English being the primary language of communication</p>	<p>1.1 The ability to communicate effectively with a diverse group of patients with a range of optometric conditions and needs</p>	<p>1.1.1 Obtains relevant history and information relating to general health, medication, family history, work, lifestyle and personal requirements.</p>	<p>Asks appropriate questions to obtain a full history. Employs appropriate strategies to understand the patient's needs by not interrupting and then summarising to check understanding.</p>
		<p>1.1.2 Elicits the detail and relevance of any significant symptoms.</p>	<p>Employs an appropriate mix of questions to elicit information from patients, for example, open and closed questions.</p>
		<p>1.1.3 Identifies and responds appropriately to patients' fears, anxieties and concerns about their visual welfare.</p>	<p>Establishes and maintains a good professional and clinical relationship with the patient to inspire trust and confidence. Recognises emotion in patients. Explores patient concerns and provides reassurance where appropriate, using explanations that are relevant to that patient.</p>
	<p>1.2 The ability to impart information in a manner which is appropriate to the recipient</p>	<p>1.2.1 Understands the patient's expectations and aspirations and manages situations where these cannot be met.</p>	<p>Conveys expert knowledge in an informative and understandable way, for example, not using jargon. Explores the patients' expectations and checks the level of understanding. Employs a patient-centred approach to understand the patient's perspective. Is able to empathise with and manage the patient's needs, resolving any problems to mutual satisfaction.</p>
		<p>1.2.2 Communicates with patients who have poor or non-verbal communication skills, or those who are confused, reticent or who might mislead.</p>	<p>Makes effective use of body language to support explanation. Demonstrates awareness of our own body language. Uses appropriate supporting material</p>
		<p>1.2.3 Discusses with the patient the importance of systemic disease and its ocular impact, its treatment and the possible ocular side effects of medication.</p>	<p>Provides a layman's explanation of the ocular impact of a particular disease Uses appropriate supporting material, for example, diagrams or leaflets, and uses a range of different explanations where required to avoid repetition. Understands limitations of knowledge, referring the patient for advice where necessary</p>
		<p>1.2.4 Explains to the patient the implications of their pathological or physiological eye condition.</p>	<p>Gives factually relevant information in a clear and understandable way, avoiding jargon and technical terms. Uses appropriate supporting material, for example, diagrams or leaflets, and uses a range of different explanations where required to avoid repetition. Understands limitations of knowledge, referring the patient for advice where necessary</p>
		<p>1.2.5 Communicates effectively with any other appropriate person involved in the care of the patient</p>	<p>Records and discusses advice and management in a clear and appropriate manner</p>

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
<p>2. Professional Conduct</p> <p>The ability to comply with the legal, ethical and professional aspects of practice</p>	<p>2.1 The ability to manage patients in a safe, appropriate and confidential environment</p>	<p>2.1.1 Adheres to Health and Safety policies in the practice including the ability to implement appropriate measures for infection control</p>	<p>Demonstrates a proactive approach to Health and Safety issues such as identifying hazards, risk assessment, first aid, etc, in order to produce a safe environment for staff and patients alike. Demonstrates appropriate personal hygiene, cleanliness of the practice, hygiene relating to instrumentation, contact lenses, disposal of clinical waste etc.</p>
		<p>2.1.2 Maintains confidentiality in all aspects of patient care</p>	<p>Demonstrates knowledge of the Data Protection Act (1987) and how this impacts on security, access and confidentiality of patient records.</p>
		<p>2.1.3 Shows respect for all patients</p>	<p>Recognises and takes into consideration patient's specific needs and requirements e.g. cultural diversity or religious belief</p>
	<p>2.2 The ability to comply with legal, professional and ethical issues relating to practice</p>	<p>2.2.1 is able to manage all patients including those who have additional clinical or social needs</p>	<p>Respects and cares for all patients and their carers in a caring, patient, sensitive and appropriate manner. Has knowledge of the Disability Discrimination Act (1995), and ensures the patient environment is safe, inviting and user-friendly in terms of access and facilities for all patients. Has an awareness of different types of disabilities and patients with additional needs. Understands the criteria and process for appropriate referral.</p>
		<p>2.2.2 Is able to work within a multi- disciplinary team</p>	<p>Respects the roles of other members of the practice team and how working together gives the patient the highest possible level of care. Is aware of local and national shared care schemes and the roles of the practice staff within these schemes.</p>
		<p>2.2.3 Is able to work within the law and within the codes and guidelines set by the regulator and the profession.</p>	<p>Demonstrates knowledge of the advice and guidance set by the respective professional body. Demonstrates knowledge of the code of conduct set down by the General Optical Council. Demonstrates a knowledge of the relevant law relating to their role e.g. Opticians Act, GOS benefits, fees and charges.</p>
		<p>2.2.4 Creates and keeps full, clear, accurate and contemporaneous records.</p>	<p>Is able to produce records which are legible and contain all relevant patient details, measurements, results and advice Demonstrates how to handle payments appropriately, effectively and honestly. Explains clearly any GOS benefits, fees and charges to the patient and records accurately all dates relating to payments.</p>
		<p>2.2.5 Interprets and responds to existing records</p>	<p>Identifies, checks and responds to the significance of previous optical correction. Modifies measurements and advice appropriately based on current correction, present requirements and previous records</p>

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
3. Methods of Ocular Examination An understanding of instrumentation used in the examination of the eye and related structures	3.1 An understanding of the use of instruments used in the examination of the eye and related structures, and the implications of results	3.1.1 Understands the methods of measurement of corneal curvature and assessment of regularity	Understands the use and optical principle of the keratometer, one and two position instruments and fixed and variable doubling. Understands the principles and use of corneal topographers
		3.1.2 Understands the examination of the external eye and related structures by use of the slit lamp	Understands the features and operation of the slit lamp Understands how direct and indirect illumination can be achieved and how the eye should be examined in a logical sequence Understands the methods used for tear assessment
		3.1.3 Understands the examination of the fundus using either a direct or indirect ophthalmoscope	Understands ophthalmoscopy and conditions required to view the fundus Understands the differences between direct and indirect ophthalmoscopy in terms of optical principle, method of use, field of view and magnification
		3.1.4 Understands the methods of assessment of colour vision	Understands classification and description of colour vision defects, descriptions and use of the different tests available for colour vision defects
		3.1.5 Understands the instruments involved in visual field analysis and the results	Understands static and kinetic perimetry and different threshold measurements Understands the different types of field analysis instruments, for example: screens, arc and bowl perimeters, automated field instruments and the Amsler chart Understands the terminology related to defective fields and how this relates to the visual pathway
		3.1.6 Understands the use of a tonometer and the results	Understands the different types of tonometry, e.g. contact and non-contact and the relative procedures Understands the diurnal variations of the results, and the implications of the results

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
4. Optical Appliances The ability to dispense an appropriate optical appliance	4.1 The ability to interpret and dispense a prescription using appropriate lenses and frames or mounts.	4.1.1 Identifies anomalies in a prescription and implements the appropriate course of action	Identifies possible errors in a prescription and follows the appropriate course of action Identifies and explains any problems which may occur from the given prescription and offer solutions, for example, aniseikonia, anisometropia
		4.1.2 Dispenses and advises on a wide range of lenses and frames, taking into account the patient's needs and requirements	Demonstrates correct interpretation of prescriptions Understands the following lens parameters Lens form, design, materials, coatings and tints, availability, blank sizes Demonstrates understanding of frames covering the following: Size, materials, relationship between frame, lenses and face Demonstrates the appropriate lens and frame selection and justification (bearing in mind patient's lifestyle requirements)
		4.1.3 Measures and verifies optical appliances taking into account relevant standards where applicable.	Measures and verifies that lenses have been produced to a given prescription within BS tolerances Verifies that all aspects of the frame or mount has been correctly supplied Measures and verifies that the lenses are correctly positioned in the spectacle frame/mount within BS tolerances
		4.1.4 Matches the form, type and positioning of lenses to meet all the patient's needs and requirements and provides appropriate advice.	Provides all the necessary information for a pair of spectacles to be duplicated, to include: <ul style="list-style-type: none"> • Prescription • Lens type • Lens form • Centration and fitting positions • Frame details • Lens surface treatments
	4.2 The ability to advise on and dispense appropriate safety, vocational, and special optical appliances.	4.2.1 Advises on personal eye protection regulations and relevant standards, and appropriately advises patients on their occupational visual requirements.	Applies the relevant standards for: <ul style="list-style-type: none"> • VDU users, driving • EN standards, including markings standards BSEN I66 and legislation and sources Demonstrates a knowledge of visual task analysis including lighting Understands the legal responsibilities for employees, employers, Dispensing Opticians and Optometrists Understands and identifies common ocular hazards and common or sight threatening leisure activities and occupations and the ability to advise patients.
	4.2.2 Recommends and dispenses special optical appliances where appropriate	Identifies and fits special optical appliances, explains their optical properties and features These will include sports, paediatric frames, safety, recumbent, reversible, flips, low vision appliances, specialist lenses, occluders, trigeminal spectacles etc	

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
	4.3 The ability to fit, adjust and repair optical appliances	4.3.1 Identifies current and obsolete frame materials and considers and applies their properties when handling, adjusting, repairing and dispensing	<p>Performs appropriate adjustments to ensure a correct fit Recognises all frame materials from associated features and handling the frames. Knows details of the manufacturing methods and how these affect the adjustment properties of the material. Demonstrates an awareness of the dermatological effects of the materials to be able to advise patients accordingly Knows whether the frame can be repaired and the appropriate repair method</p>
		4.3.2 Demonstrates knowledge of frame and lens manufacturing and the application of special lens treatments.	<p>Identifies the difference between glass and plastics materials and has a knowledge of the properties of each material, manufacturing methods and associated advantages and disadvantages Knows the different manufacturing methods of frames to include injection moulding, routing and wire formation. Knows of the different methods of tint and coating applications and the associated advantages and disadvantages of each</p>
	4.4 The ability to dispense low vision aids	4.4.1 Understands conditions which cause visual impairment and to dispense the most appropriate low vision aid/advice	<p>Identifies which patients would benefit from low vision aids and advice Understands the principles of magnification, field of view and working distance in relation to different aids Provides advice on the advantages and disadvantages of different types of simple low vision aids Understands the mechanisms of prescribing magnification including acuity reserve Gives correct instruction to a patient in the use of various aids, to include:</p> <ul style="list-style-type: none"> • Which specs to use with aid • Lighting required • Appropriate working distance <p>Provides basic advice on non-optical aids, use of contrast and lighting to enhance visual performance and daily living skills</p>
	4.5 The ability to relate general anatomical features, including the development of a child's facial anatomy to the fitting of optical appliances	4.5.1 Accurately records facial measurements and dispenses the most appropriate appliance taking into account development, comfort, function and safety	<p>Takes accurate facial measurements and appreciates the implications of anatomical features and how these relate to the final fitting position of the appliance Knows about special frame features, for example, inset bridges, and handmade frames Appropriately advises on paediatric frame fitting, including specialist bridge and side features</p>

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
5. Contact Lenses An understanding of the fitting and aftercare of patients with rigid and soft contact lenses	5.1 An understanding of the selection and fitting of the most appropriate contact lens for the planned use and clinical needs of the patient.	5.1.1 Understands contact lens types and materials, their benefits and disadvantages, and their most appropriate applications	Understands <ul style="list-style-type: none"> • the differences between RGP, soft and scleral contact lenses. • the advantages and disadvantages of all types of contact lenses Has a knowledge of differences in contact lens materials currently used for RGP and all types of soft lenses including silicone hydrogels Understands the advantages and disadvantages of wearing contact lenses compared with spectacles Has a knowledge of other applications of contact lenses e.g. therapeutic lenses and in low vision
		5.1.2 Understands the initial contact lens selection and fitting of RGP and soft contact lens patients	Understands, at foundation level, the typical parameters of RGP and soft lenses and their relationship to corneal measurements Understands the shape of the normal cornea, the fitting philosophies of RGP and soft lenses, and the lens' behaviour on the eye
	5.2 Understands the patients instruction in contact lens handling, and all aspects of lens wear including care regimes	5.2.1 Understands the different methods of contact lens removal and the ability to remove the lens in an emergency, if feasible, and the ability to discuss the use of care regimes	Knows the methods of insertion and removal of RGP and soft lenses by a contact lens wearer Understands how a suitably skilled practitioner should remove a lens in an emergency Knows the relative advantages and disadvantages of RGP and soft lens care regimes, the solutions' constituents and their purpose Understands the importance of wearing schedules and regular aftercare visits
		5.2.2 Understands both the aftercare of patients wearing RGP and soft contact lenses and the management of any complications	Understands the minor issues which can arise during adaptation or that are identified at the aftercare appointment, and how these are managed Understands the signs and symptoms of serious contact lens complications such as microbial keratitis, severe corneal abrasion, or misuse of solutions, and the appropriate referral procedure

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
6. Low Vision The management of low vision patients	6.1 An understanding of the causes of low vision and their effects on vision	6.1.1 Considers the effectiveness of current refraction of patients with low visual acuity and to refer back where appropriate	Understands the main causes of low vision and the effect on vision Checks the date of the last eye examination and when the last spectacles were dispensed and if the patient is wearing those spectacles. Uses a pinhole and confirmation tests to check effectiveness and refer back if necessary Understands the referral procedure associated with unexplained/sudden vision loss Understands the criteria for visual impairment registration and referral
	6.2 The ability to assess a patient with low vision	6.2.1 Understands the assessment of visual function, including the use of specialist charts, the effects of illumination, contrast and glare	Knows the different types of test charts available for distance and near vision and assessment of contrast sensitivity Understands the effects of lighting, contrast and glare on vision
		6.2.2 Understands the assessment of the visual field of patients with reduced vision	Understands <ul style="list-style-type: none"> • the need for visual field tests and the different types available • the different types of field loss e.g. hemianopia, central field loss etc
		6.2.3 Understands binocular vision in relation to low vision appliances	Understands the indications for supplying binocular and monocular LVAs and the use of occlusion, for example, to combat convergence problems with high adds, suitable alignment of binocular telescopes etc
	6.3 The ability to advise on the use of and dispense appropriate low vision aids	6.3.1 Dispenses relevant optical low vision aids and common types of non-optical low vision aid	Questions the patient about their occupation, hobbies and lifestyle in order to dispense an appropriate aid to assist the patient Understands the principles of magnification, field of view and working distance in relation to different aids Knows the availability of non-optical aids such as CCTV, TV reader-systems and aids for daily living, and where to source these aids Trains the patient to use the aid effectively and replace batteries and bulbs if required
		6.3.2 Advises patients on illumination, glare and contrast	Advises patients on <ul style="list-style-type: none"> • the benefit of appropriate lighting in the home • how to minimise different types of glare and how to improve the contrast out of doors and in the home environment, text type, etc can also benefit the patient • selection of appropriate tints
	6.4 The ability to advise, refer and provide aftercare to low vision patients	6.4.1 Advises patients about their impairment and its consequences	Able to empathetically understand and manage the potential concerns of the patient Discusses with the patient their concerns in terms that are easily understood Discusses the management of their impairment, referral and benefits of registration, other sources of help and support
		6.4.2 Understands the need for multi- and inter-disciplinary approaches to low vision care	Understands the importance of a current eye examination, ophthalmological assessment/ treatment Able to explain the process and criteria for registration and the associated benefits
		6.4.3 Refers low vision patients to other agencies where appropriate	Knows where and how to access additional support e.g. a resource centre, social services, etc
		6.4.4 Manages the aftercare of low vision patients	Understands factors affecting frequency of aftercare to include; likely progress of pathology, retraining with selected aids, the need for different/ additional aids

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
7.Refractive Management An understanding of methods of assessing vision, refraction, binocular status and visual acuity in all patients	7.1 An understanding of refractive prescribing and management decisions	7.1.1 Understands the refraction of a range of patients by appropriate objective and subjective means	Understands retinoscopy and end-point subjective results Understands appropriate checking methods, e.g. +1.00D blur and use of pin-hole Understands determination of addition power and appropriate range
		7.1.2 Understands the use of ocular diagnostic drugs to aid refraction	Understands different types of ocular drugs and their purpose e.g. mydriatics, anaesthetics, diagnostic stains etc Understands the mode of action, dosage, function and effects and the regulations affecting use and storage of ophthalmic drugs
		7.1.3 Understands the methods of refracting children, cycloplegic drugs and their effects, and understands prescribing and management decisions	Understands <ul style="list-style-type: none"> • the different distance and near test methods designed for children • the function and effect of cycloplegic drugs • the critical period and paediatric prescribing decisions and their purpose, e.g. early onset myopia
		7.1.4 Understands refraction of patients with reduced visual acuity	Understands the testing methods involved with reduced visual acuity, for example LogMar, and the related terms to record low levels
		7.1.5 Understands the investigation and management of patients presenting with heterophoria, heterotropia and amblyopia based anomalies of binocular vision, including the relevance of history and the recognition of any clinical symptoms	Understands <ul style="list-style-type: none"> • signs and symptoms and causes of binocular vision anomalies • the different methods of classification e.g. cover test, pin hole etc • how the patient may be managed, e.g. surgery, prescribed prisms etc
		7.1.6 Understands the objective and subjective tests necessary to investigate binocular vision status	Understands the different objective tests available to assess deviation, e.g. cover and motility tests Understands the different subjective tests available to assess deviation, e.g. fixation disparity tests
		7.1.7 Understands likely management options related to the prescribing of the appliance	Understands the options to include; vision training, refractive correction, modified refractive correction, prismatic correction
		7.1.8 Understands the investigation and management of patients presenting with incommittant deviations, including the recognition of symptoms and referral advice	Understands the use of cover test and motility. Takes accurate history and symptoms – new/longstanding Understands diplopia management options – prisms, occlusion and surgery
		7.1.9 Understands diagnostic methods for patients with field defects	Understands different types of field loss and the causes Understands the adaption of examination techniques e.g. fixation target for cover test/ocular examination

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
<p>8.Ocular Abnormalities</p> <p>An understanding of the relevance of ocular disease</p>	<p>8.1 The ability to recognise conditions and symptoms requiring referral and/or emergency referral and the demonstration of the ability to take appropriate action</p>	<p>8.1.1 Identifies common diseases of the external eye and related structures</p>	<p>Recognises signs and symptoms of external eye and adnexa, for example; keratitis, iritis, blepharitis, chalazion, ectropion, entropion, epicanthus, hordeolum, ptosis, stye, xanthelasma, conjunctivitis, melanoma, pinguecula, subconjunctival haemorrhage</p>
		<p>8.1.2 Understands symptoms associated with internal eye disease</p>	<p>Understands symptoms associated with internal eye disease such as diabetic retinopathy, retinal vascular disorders, retinitis pigmentosa, retinal and vitreous detachment, macular degeneration, for example</p>
		<p>8.1.3 Understands the clinical treatment of a range of significant ocular diseases/disorders and conditions</p>	<p>Understands the surgical treatments, drug treatments and self-treatment such as hot compresses, hygiene regimes, etc</p>
		<p>8.1.4 Understands the clinical treatment of a range of systemic diseases with ocular manifestations and adverse ocular reactions to medication</p>	<p>Understands treatment of a range of systemic diseases, for example, diabetes and hypertension Understands adverse ocular reactions to medication</p>
		<p>8.1.5 Understands the implications of the manifestations of eye disease</p>	<p>Understands how the disease will progress with or without treatment and the prognosis in terms of affecting the vision and likelihood of reoccurrence Demonstrates an awareness of diet and vitamin and mineral supplements that may also be beneficial</p>
		<p>8.1.6 Recognises and deals with ocular emergencies</p>	<p>Recognises an ocular emergency and refers the patient in an appropriate manner.</p>

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
9. Paediatric Dispensing The ability to dispense an appropriate optical appliance, taking into account the development of anatomical features	9.1 The ability to communicate effectively with the child and their carer	9.1.1 Directs communication to the child in appropriate language and manner	Understands the view of a child and elicits information on their preferences Engages the child in discussions and decisions relating to the dispensing Uses appropriate supporting material to aid understanding
		9.1.2 Discusses with the carer as appropriate the factors influencing dispensing	Conveys expert knowledge in an understandable and informative way Establishes and maintains a good professional and clinical relationship Explores patient concerns and provide explanation and reassurance where appropriate Aware of implications in discussing factors with a carer
	9.2 An understanding of paediatric refractive prescribing and management decisions	9.2.1 Understands the methods of refracting children and prescribing decisions	Understands <ul style="list-style-type: none"> • the different distance and near test methods designed for children • the function and effect of cycloplegic drugs • the critical period, paediatric prescribing decisions and their purpose, e.g. early onset myopia
		9.2.2 Understands the investigation and management of children presenting with anomalies of binocular vision	Understands <ul style="list-style-type: none"> • signs and symptoms and causes of binocular vision anomalies • how the condition may be managed, e.g. occlusion, prescribed prisms etc
	9.3 The ability to advise on and measure for the most appropriate paediatric frames	9.3.1 Takes accurate facial measurements	Takes accurate pupillary distance using a range of methods appropriate to age and fixation ability Takes accurate facial measurements and appreciates the implications of anatomical features and how these relate to the final fitting of the appliance Appreciates the difference in features for children from different nationalities, or those with conditions such as Down's Syndrome
		9.3.2 Understands changes in measurements as the facial features develop	Explains the development expected as a child grows and how this affects facial measurements and frame fitting Conveys the importance of frame function in terms of comfort, fit, position and safety
		9.3.3 Advises on appropriate frames and availability of special features	Accurately records frame details, adjustments and appropriate measurements Fits specialist frame parts where appropriate such as specialist bridge and side options Advises on frame shape, size and position with consideration to the prescription and cosmesis

Unit of Competency	Elements of Competence	Performance Criteria	Indicators
	9.4 The ability to advise and measure for the most appropriate lens choice	9.4.1 Advises on lens choice with emphasis on safety, comfort and cosmesis	Demonstrates appropriate advice for a wide range of prescriptions in terms of materials deemed high impact resistance, such as polycarbonate Considers the weight of the finished lens and any improvements that can be made to overall comfort, such as reduced aperture or aspheric forms Explains how cosmesis may be improved by ordering certain manufacturing techniques such as minimum substance surfacing or altering the form of the lens
		9.4.2 Measures for lens positioning	Accurately measures for lens centration, vertical and horizontal optical centre positioning Considers the pantoscopic angle and vertex distance to ensure a close fit that is not making inappropriate contact with the face
	9.5 The ability to fit, adjust and repair paediatric optical appliances	9.5.1 Fits the appliance effectively and has the ability to adjust and repair the appliance	Ensures the spectacles are a comfortable fit and the child is looking through the appropriate portion of the lens Explains the importance of maintaining a good fit and is able to adjust and repair where necessary Advises the child and carer on how to care for the spectacles

Level 6 Diploma in Ophthalmic Dispensing

Certificate of Competence

The knowledge and skills a dispensing optician must possess, in order to register with the GOC and practise in the UK.

To be completed by each Student, Training Institute and the ABDO to confirm compliance with the GOC Core Competency requirements.

The Units referred to throughout this document relate to the Units referred to in the current Conditions of Admissions Syllabus 2015.

Student Name:					
Training Institute:				Date Course Commenced:	
Course Title:					
GOC No.:			ABDO No.:		
Year 1 completed:		Year 2 completed:		Year 3 completed:	
Resits completed:		Resits completed:		Resits completed:	

Competency 1: Communication

The ability to communicate effectively with the patient and any other appropriate person involved in the care of the patient, with English being the primary language of communication.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations	FQE Unit 12 Section B			
ABDO Examinations	FQE Unit 12 Section E			
ABDO Examinations	Practice Visit Assessment			
Confirmation by Training Institute that this competency has been complied with during the course.				

Competency 2: Standards of Practice

The ability to comply with the legal, ethical and professional aspects of practice.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations	FQE Unit 12 Section C			
ABDO Examinations	FQE Unit 12 Section E			
Practice Based Learning	Practice Visit Assessment			
Confirmation by Training Institute that this competency has been complied with during the course.				

Competency 3: Methods of Ocular Examination

An understanding of instrumentation used in the examination of the eye and related structures.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations or Approved Exemption	FQE Unit 9			
Confirmation by Training Institute that this competency has been complied with during the course.				

Competency 4: Optical Appliances

The ability to dispense an appropriate optical appliance.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations	PQE Unit 2 Section B			
ABDO Examinations	PQE Unit 2 Section C			
ABDO Examinations	FQE Unit 12 Section A			
ABDO Examinations	FQE Unit 12 Section B			
ABDO Examinations	FQE Unit 12 Section C			
ABDO Examinations	FQE Unit 12 Section D			
ABDO Examinations	FQE Unit 12 Section E			
ABDO Examinations	Manufacturing Visit			
Confirmation by Training Institute that this competency has been complied with during the course.				

Competency 5: Contact Lenses

An understanding of the fitting and aftercare of patients with rigid and soft contact lenses.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations or Approved Exemption	FQE Unit 11			
Confirmation by Training Institute that this competency has been complied with during the course.				

ABDO Examinations	FQE Unit 12 Section E			
-------------------	-----------------------	--	--	--

Competency 6: Low Vision

The management of low vision patients.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations	FQE Unit 12 Section C			
ABDO Examinations	FQE Unit 12 Section E			
ABDO Examinations	Practice Visit Assessment			
Confirmation by Training Institute that this competency has been complied with during the course.				

Competency 7: Refractive Management

An understanding of methods of assessing vision, refraction, binocular status and visual acuity in all patients.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations or Approved Exemption	FQE Unit 9			
Confirmation by Training Institute that this competency has been complied with during the course.				

Competency 8: Ocular Abnormalities

An understanding of the relevance of ocular disease.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations or Approved Exemption	FQE Unit 5			
Confirmation by Training Institute that this competency has been complied with during the course.				

ABDO Examination	FQE Unit 12 Section D			
------------------	-----------------------	--	--	--

Competency 9: Paediatric Dispensing

The ability to dispense an appropriate optical appliance, taking into account the development of anatomical features.

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations or Approved Exemption	FQE Unit 9			
Confirmation by Training Institute that this competency has been complied with during the course.				

ABDO Examination	FQE Unit 12 Section A			
ABDO Examination	FQE Unit 12 Section B			
ABDO Examination	Practice Visit Assessment			

Learning Outcome for Competencies not mapped

Knowledge acquired for the following units, in preparation for other Core Competencies above:

Method of Assessment		No. of Attempts	Date Completed	Signature
ABDO Examinations or Approved Exemption	PQE Units 1a&1b			
ABDO Examination	PQE Unit 2 Section A			
ABDO Examination	PQE Unit 2 Section D			

Student Declaration

- I have read and understand the Core Competencies outlined above, as required by the General Optical Council, in relation to the course I am undertaking with _____ (*insert name of training institute*).
- I agree to undertake the required assessments, examinations and core competencies leading to the Level 6 Diploma in Ophthalmic Dispensing whilst remaining a GOC Student Dispensing Registrant and an ABDO student member.

Keeping to schedule and late assignments

It is important that you work to the course schedule supplied and submit your assignments on a weekly basis. It can be incredibly difficult to catch up if you fall behind and you will lose marks. If you are struggling for any reason, please inform the Tutor immediately.

Please be aware that **all** Tutors must follow the schedule below. It is expected that this will eliminate any differences between Tutors and provide a fair and even framework for the students. Please do not ask them to deviate from it.

- Assignments are due on Wednesdays. However, electronic submissions must arrive by 11.59pm on Tuesdays. Emailed assignments must be in PDF format.
- Assignments submitted early will not be returned before the due date as this releases answer guides into the student network.
- Postal assignments received after Wednesday will be marked as late, unless proof of postage can be produced.
- The **first** time an assignment is submitted late it will be marked and returned with a warning that further late submissions will be penalised.
- The **second** late assignment will be marked, awarded with half marks and returned with a warning that any further late submissions will not be accredited with any marks.
- **All subsequent** late assignments will always be corrected so that you can rectify any mistakes you have made. However no marks will be allocated for these assignments on your record sheet.
- If your course contains CC assignments (Diploma, Degree and Contact Lens Certificate; see Guidelines section for further information), re-submission of CC assignments will not be considered late, as long as they are submitted in accordance with the deadline provided by your Tutor.

If you have arranged an extension with the Tutor prior to the due date and have met the new date agreed, this will not be considered late.

Degree Students only

Due to University regulations extensions of more than two weeks may not be authorised for degree students without the agreement of the Principal. Under normal circumstances degree students requiring an extension of more than two weeks will have to apply for concessions by following the formal concessions procedure.
